

# AAA PRODUCTION INC.

## M.O.P.A. Purchase Agreement

Effective: October, 2018

In this agreement, AAA Production Inc. will be referred to as the manufacturer and you will be referred to as 'you' or the purchaser. You will be contracting with the manufacturer to build you a 1930's - 1950's style RF (Radio Frequency) M.O.P.A. (Master Oscillator Power Amplifier) amplifier. You agree to take full responsibility for the instrument and understand that it comes with no medical claims, written or implied. This instrument is built to order under contract and may take up to 72 hours to ship the order. The instrument comes with a limited two-year parts and labor warranty. The only exception is that the 812a internal vacuum tube comes with a 90-day warranty due to the fact that this is the manufacturer's limited warranty. The only limit on the warranty is if the purchaser has in any way abused the instrument by not keeping the milliamp meter power range at 240 milliamps or less. If this is the case, then the purchaser will be required to pay for the parts necessary to repair it. The labor to repair the instrument will be covered under the warranty. The best power range to use is 200 to 220 milliamps to promote a longer 812a vacuum tube life.

The purchaser understands and takes full responsibility for the use of this instrument. In order to avoid potential problems, certain precautions should be taken to make sure that you do not interfere with anyone else. The following important precautions must be followed. Please note that these precautions are not all inclusive to fit your particular circumstances:

1. Be a good neighbor. If you live in an apartment or condominium, always put the instrument on an outside wall away from your neighbors. It could potentially disrupt their computer, radio or television that may be on the opposite side of the wall only one to two feet away.
2. The two red and black wires on the gas plasma tube, which plug into the M.O.P.A. antenna receptacles, are connected. NEVER remove the shrink wrap straps holding the two wires together. If you do the instrument may broadcast up to 1/3 of a mile and potentially bother your neighbors. If for some unknown reason you just happen to bother your neighbor try using the instrument when they are not home, late at night or early in the morning.

The M.O.P.A. and GB-4000 instruments have a 60-day money back guarantee. If you choose to return the equipment, a return authorization (RA#) number is required from your distributor. Once we receive the instruments back you will be refunded your purchase price less a 15% restocking fee and original shipping charge.

INTERNATIONAL CUSTOMERS ONLY - FedEx International and USPS Priority Mail Express Shipping Policy: You agree that if the receiver/consignee and/or purchaser refuses or abandons the package(s) for any reason that you as the purchaser will pay for the duty, taxes, tariffs, handling/storage charges and any other customs fees accrued regardless if the package is delivered to the receiver/consignee, disposed of, or returned to the shipper. Purchaser assumes all liability for any additional fees charged by any agent of the seller and/or shipper which are not listed on the invoice/receipt. This assumed liability includes any return shipping costs incurred if the shipment is not accepted, cleared for release by a customs agent, or signed for by purchaser/consignee at the time of delivery. You agree that if the package(s) is returned back to the shipper by FedEx International, United States Postal Service, or other courier, you as the purchaser will pay for the return shipping costs in addition to any other fees charged by any agent of the seller and/or shipper which are not listed on the invoice/receipt.
